

SRLINES wCRM Bitrix24 App

WhatsApp Integration Setup Guide

Welcome!

Thank you for choosing **SRLINES wCRM Bitrix24 App for WhatsApp Integration**.

This guide will help you connect your **Bitrix24 Open Channel** with the **SRLINES Messaging Platform** quickly and easily, even if you're setting it up for the first time.

Step 1: Create an Open Channel

Create a New Communication Channel

1. Login to your **Bitrix24 CRM**.
2. Navigate to:

Contact Center → Open Channels

1. Create a **New Open Channel / Line**.
2. Open the newly created channel settings.
3. Look at your browser URL and note the **Open Channel ID (Line Number)**.

 Keep this number safe. It may be required during troubleshooting or future configuration updates.

 Open Channel created successfully!

Step 2: Create a Local Application

Navigate to:

Applications → Developer Resources → Other → Local Application

Configure the application using the following settings.

Application Configuration

Application Type

Server

Handler Path

`https://bitrix24.srlines.net/oauth/callback`

Initial Installation Path

`https://bitrix24.srlines.net/install.html`

Menu Item Text (English)

SRLINES wCRM Connector

Additional Settings

 Leave the following option UNCHECKED:

Script only (no user interface)

Required Permission Scopes

Select all of the following scopes:

☒ CRM

☒ Chat and Notifications

☒ Open Channels

☒ External Messenger Connectors

Important: Save Application Credentials

After clicking **Save**, Bitrix24 will generate the following credentials:

Application ID

client_id

Application Key

client_secret

 Copy and save both values in a secure location.

 These credentials will be required for future maintenance, troubleshooting, migrations, or support requests.

 Local Application configured successfully!

Step 3: Obtain Your SRLINES API Key

Before installing the connector, make sure you have an active SRLINES account.

Login to SRLINES Platform

https://crm.srlines.net/user/login

After logging in:

1. Open the top navigation menu.
2. Click **API Access**.
3. Locate your API Key.

If No API Key Exists

1. Click **Generate API Key**.
2. Wait for the key to be generated.
3. Click the API Key to automatically copy it to your clipboard.

 Keep this API Key secure.

 Do not share your API Key with unauthorized persons.

✓ API Key ready!

Step 4: Install & Activate the Connector

Return to your **Bitrix24 Local Application** page.

Final Installation Steps

1. Verify that:
2. Open Channel has been created.
3. API Key has been generated.
4. Application ID (client_id) has been saved.
5. Application Key (client_secret) has been saved.
6. Click **Save** if you made any changes.
7. Click **Install** or **Reinstall**.
8. Wait a few moments while Bitrix24 establishes communication with the SRLINES platform.
9. Once the installation completes successfully, the connector will be activated automatically.

 Congratulations!

Your **SRLINES wCRM WhatsApp Connector** is now connected with Bitrix24 CRM.

What You Can Do Now

- ✦ Receive WhatsApp messages directly inside Bitrix24
- ✦ Reply to customers from CRM
- ✦ Manage conversations through Open Channels
- ✦ Centralize customer communication
- ✦ Improve customer response times
- ✦ Track and manage interactions efficiently

Credentials Checklist

Before closing this setup, make sure you have saved:

☒ Open Channel ID (Line Number)

☒ API Key

☒ Application ID (client_id)

☒ Application Key (client_secret)

Keeping these values available will make future support and maintenance much easier.

Setup Complete!

Your **SRLINES wCRM Bitrix24 WhatsApp Integration** is now ready to use.

Enjoy seamless WhatsApp communication directly from your Bitrix24 CRM and deliver an even better customer experience! 🚀💬
